

In the Claims

The following Listing of Claims replaces all prior versions in the application:

LISTING OF CLAIMS

1. (Currently amended) An apparatus for presenting audio and/or video selections to a user, comprising:

a user interface, connected to ~~the~~ a processor, through which the user identifies a particular audio and/or video selection;

a radio modem connected to the processor, the radio modem communicating the identity of the particular selection to a provider over a cellular network and receiving the selection in electronic format from the provider via the cellular network; and

a presentation device operating to present the particular selection to the user in audio and/or video form; and

a detachable LCD tablet configured to communicate wirelessly with the processor.

2. (Original) The apparatus of Claim 1, further comprising an optical media reader connected to the presentation device, the optical media relating to audio and/or video information presentable by the presentation device.

3. (Original) The apparatus of Claim 2, wherein the optical media is a music compact disc and/or DVD.

4. (Original) The apparatus of Claim 1, further comprising magnetic media reader connected to the presentation device, the magnetic media relating to audio and/or video

information presentable by the presentation device.

5. (Original) The apparatus of Claim 1, further comprising a persistent storage media reader.
6. (Original) The apparatus of Claim 5, wherein the persistent storage media is a removable flash memory.
7. (Original) The apparatus of Claim 1, wherein the particular selection is obtained via the Internet.
8. (Original) The apparatus of Claim 1, wherein the radio modem uses cellular telephone interconnectivity.
9. (Original) The apparatus of Claim 8, wherein the radio modem is configured to establish a cellular telephone connection with another user.
10. (Original) The apparatus of Claim 1, wherein the particular selection is received by the radio modem in streaming media form.
11. (Original) The apparatus of Claim 1, wherein the particular selection is received by the radio modem as a compressed data file.
12. (Original) The apparatus of Claim 1, wherein the processor is provided with Internet

browsing capability.

13. (Original) The apparatus of Claim 1, wherein the processor is configured as a personal digital assistant and includes contacts storage and calendaring capabilities.

14. (Original) The apparatus of Claim 1, wherein the processor is provided with email capability such that email can be transmitted and received by the processor.

15. (Original) The apparatus of Claim 1, further comprising a connection port for connecting the processor to a data source for transfer of data to and from the data source.

16. (Previously presented) The apparatus of Claim 15, wherein the connection port is a USB port.

17-18. (Canceled)

19. (Original) The apparatus of Claim 1, wherein the user interface includes a microphone, the processor being configured to recognize voice input received through the microphone.

20. (Original) The apparatus of Claim 1, wherein the user interface includes a touchpad.

21. (Currently amended) An apparatus for presenting audio and/or video selections to a user, comprising:

processing means;

means for enabling the user to identify a particular audio and/or video selection;

means connected to the processing means for communicating the identity of the particular selection to a provider over a cellular network and receiving the selection in electronic format from the provider via the cellular network; and

means for presenting the particular selection to the user in audio and/or video form; and

a detachable display means configured to wirelessly communicate with the processing means.

22. (Original) The apparatus of Claim 21, further comprising means for reading optical media connected to the presentation device, the optical media relating to audio and/or video presentable by the means for presenting.

23. (Original) The apparatus of Claim 22, wherein the optical media is a music compact disc and/or DVD.

24. (Original) The apparatus of Claim 21, further comprising means for reading magnetic media connected to the means for presenting, the magnetic media relating to audio and/or video information presentable by the means for presenting.

25. (Original) The apparatus of Claim 21, further comprising means for reading persistent storage media.

26. (Original) The apparatus of Claim 25, wherein the persistent storage media is a removable flash memory.

27. (Currently Amended) The apparatus of Claim-~~4~~ 21, wherein the particular selection is obtained via the Internet.
28. (Original) The apparatus of Claim 21, wherein the means for communicating and receiving uses cellular telephone interconnectivity.
29. (Original) The apparatus of Claim 28, wherein the means for communicating and receiving is configured to establish a cellular telephone connection with another user.
30. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the particular selection is received by the means for communicating and receiving in streaming media form.
31. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the particular selection is received by the means for communicating and receiving as a compressed data file.
32. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the processing means is provided with Internet browsing capability.
33. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the processing means is configured as a personal digital assistant and includes contacts storage and calendaring capabilities.
34. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the processing means is

provided with email capability such that email can be transmitted and received by the processing means.

35. (Currently Amended) The apparatus of Claim-~~34~~ 21, further comprising a means for connecting the processing means to a data source for transfer of data to and from the data source.

36. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the means for connecting is a USB port.

37-38. (Canceled)

39. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the user interface includes a microphone, the processing means being configured to recognize voice input received through the microphone.

40. (Currently Amended) The apparatus of Claim-~~34~~ 21, wherein the user interface includes a touchpad.
